

Natal Token (NATAL) – Whitepaper

Natal Token is a BEP-20 blockchain-based digital asset designed to support maternal and prenatal healthcare globally. By leveraging decentralized finance, Natal Token enables transparent funding, equitable access to healthcare resources, and sustainable support for pregnant women and new mothers.

1. Problem Statement

Millions of pregnant women worldwide lack access to essential prenatal and maternal healthcare services due to cost, geographical barriers, and inefficient funding systems. Traditional aid models suffer from lack of transparency and scalability.

2. Solution

Natal Token introduces a blockchain-powered ecosystem that channels resources directly to verified healthcare programs, enables peer-to-peer value transfer, and ensures accountability through immutable smart contracts.

3. Tokenomics

• Token Name: Natal Token • Symbol: NATAL • Network: Binance Smart Chain (BEP-20) • Max Supply: 16,000 NATAL • Distribution Period: 10 years • Faucet Reward: 0.09 NATAL (one-time per wallet)

4. Use Cases

• Funding prenatal checkups • Supporting maternity clinics • Incentivizing health education • Donations and grants distribution

5. Governance & Transparency

Natal Token will transition into a community-governed DAO. All allocations and disbursements will be auditable on-chain.

6. Roadmap

Phase 1: Token launch and faucet Phase 2: Healthcare partnerships Phase 3: DAO governance
Phase 4: Global expansion

7. Legal Disclaimer

Natal Token is not a security. This document is for informational purposes only and does not constitute financial advice.
